

CGS™ offers a wide range of **MDXD™** Enhanced Security gaskets, Metal Detectable X-Ray Detectable with sanitary connections. Today's systems must achieve optimum processing performance while still maintaining security against elastomeric contaminants. **CGS™** Enhanced Security gasket materials offer a choice solution to making sure your system is not contaminating your product. The FDA food safety Modernization Act emphasis on prevention and what better way to get reassurance than to have better security. Our **MDXD™** is offered in most sanitary materials and connections. **CGS™ MDXD™** Enhanced Security Gaskets are common throughout the food, beverage, dairy, pharmaceutical and biotech sanitary process industries.

CGS™ MDXD™ Enhanced Security gaskets can be found in many validated sanitary systems. **MDXD™** materials can be used with orifice plates, screen gaskets, O-rings, Tri-Clamp® gaskets, Manway gaskets, camlock gaskets, perforated gaskets and many more applications.

FEATURES

- Safety & Prevention
- FDA Compliant
- Validatable
- Insurance on Integrity
- Available in most Elastomers
- Tri-Clamp® Connections
- Bevel Seat Connections
- Effective Inspection
- High Temperature
- O-Rings Available
- Inspectable Finished Products
- Flexi-Steel™ Available
- Available in Rod, Foam and Sheet
- Enhanced System Security Gaskets

CGS™ MDXD™ Metal Detectable X-Ray Detectable Gaskets meet FDA Title 21 CFR 177 .2600, FDA Title 21 CFR 177 .1550, Current Good Manufacturing Practices (CGMP), ASME, Animal Derived Ingredient Free (ADI), FDA Compliant Mold release. BUNA-N is FDA Only.
