

SANITARY DOUBLE PIN CLAMPS

CGS™ sanitary double pin clamps are used in a variety of process piping systems. This connection is made up of Stainless-Steel ferrules with the gasket pressed in between. The clamp goes over the sides of the ferrules and compresses the two together. This makes a union or clamp connection. This is a fast easy come together connection that is very sanitary and leak free. Sanitary Tri-Clamps® are one of the most common connective technologies used today. CGS™ offers a wide range of sanitary clamps. The clamps come for standard use or for high pressure. These are offered in a wide range of materials with 304 SS the most common.

Material - 304 Stainless Steel, 316 Stainless Steel

Sizes - 1.5 inch, 2 inch, 2.5 inch, 3 inch, 4 inch, 10 inch

Material

Standard 304 Stainless Steel.

Optional 316 Stainless Steel.

Standard Sanitary Clamps

- Double Pin Hinged Clamp Fractional for Sizes under 1" Part Number – CGS-SS13MHH-DP
- Double Pin Hinged Clamp Standard for Sizes 1" to 12" Part Number – CGS-SS13MHH-DP

Part Number	Description
CGS13MHHM-DP-150	1.5" – 304SS
CGS13MHHM-DP-200	2" – 304SS
CGS13MHHM-DP-250	2.5" – 304SS
CGS13MHHM-DP-300	3" – 304SS
CGS13MHHM-DP-400	4" – 304SS
CGS13MHHM-DP-1000	10" – 304SS
