

3/4" to 2"

Additional Sizes Available

**Security** Gauge Protector Gaskets are made for the safety and protection of your gauge's diaphragms. They also give an added layer of protection for all your Sanitary Clamp hoses, gauges and pump connections. Gauge diaphragms, for instance, can be damaged during autoclaving and routine maintenance. Pump head connections can become dented and dinged. Security gauge protectors can help to stop these expensive issues. They are designed to fit over clamp connections and snap into place. The heavy platinum cured silicone has a 316 stainless steel perforated plate and a harness for holding while not in use. It has a perforated plate, so steam will completely permeate when the gauge is placed in an autoclave. Gauge Protector gaskets are fantastic for sanitary hose storage.

**Material** - Platinum Cured Silicone

**Sizes** - .75 inch, 1 inch, 1.5 inch, 2 inch

Sanitary Security protector gaskets meet FDA, USP Class VI Criteria, FDA Title 21 CFR 177 .2600, FDA Title 21 CFR 177 .1550, Current Good Manufacturing Practices (CGMP), ASME, Animal Derived Ingredient Free (ADI), FDA Compliant Mold release. BUNA-N is FDA Only.

**Security** Gauge Protectors offer freedom from danger of damage (**safety**).

## Features

- Sanitary Clamp Type I
- Gauge Safeguard
- Easy to Install
- Fits most Sanitary Clamp Instruments
- Extends the life of a Gauge's Diaphragm
- Damage free Autoclaving
- Hose Protection
- FDA & USP Class VI Compliant Materials

## Materials

- 316 Stainless Steel
- Platinum Cured Silicone
